

# CLIMATE CRISIS FUELS RISING VIOLENCE AGAINST CHILDREN: EVIDENCE ACROSS CHILD PROTECTION RESEARCH

UNICEF/Sokhin

**VIRTUAL EVENT AT HNPW 2026**

**3 March 2026**  
10:00 – 11:30 CET

**EXPLORE HOW CLIMATE SHOCKS ARE  
INTENSIFYING RISKS OF VIOLENCE,  
EXPLOITATION, AND HARM TO CHILDREN  
ACROSS DIVERSE CONTEXTS.**

Join us during the **2026 Humanitarian Networks and Partnerships Week** for a research-informed session hosted by the Alliance, bringing together evidence from Aangan Trust, Terre des Hommes Netherlands, the University of Cape Town and the University of Oxford. Drawing on research from South Asia and sub-Saharan Africa, the session highlights consistent pathways linking climate stress to child labour, early marriage, unsafe migration, and multiple forms of violence against children. Participants will explore cross-sectoral strategies to strengthen child protection systems before, during, and after climate shocks.

## What to Expect?

- Increased understanding of the intersectionality of child protection and climate crises.
- Identification of potential pathways for protecting children in climate disasters
- Practical insights to inform programmes, policies, and research addressing climate-induced risks to children.
