

LOCALLY LED, GLOBALLY SUPPORTED: EXPLORING WAYS TO LOCALISE THE PRODUCTION AND SHARING OF TECHNICAL KNOWLEDGE

UNICEF/Elfatih

VIRTUAL EVENT AT HNPW 2026

2 March 2026
14:00 – 15:00 CET

DISCOVER HOW HUMANITARIAN TECHNICAL SUPPORT CAN BE DELIVERED CLOSER TO THE POINT OF IMPACT IN A TIME OF SHRINKING RESOURCES AND GROWING NEEDS.

Join us during the **2026 Humanitarian Networks and Partnerships Week** for an interactive session **co-hosted by the Alliance for Child Protection in Humanitarian Action and the Inter-Agency Network for Education in Emergencies**. Drawing on recent survey findings and practical examples, the session explores how the sector can shift from globally driven models toward locally led, globally supported approaches to technical knowledge. Through shared reflection and dialogue, participants will examine current capacity gaps, unpack what effective decentralised technical support could look like across sectors.

What to Expect?

- Shared understanding of current technical capacity gaps, drawing on CPHA and EiE survey findings.
- Collective insights into what effective, locally grounded technical support could look like across sectors.
- Sharing inputs to help inform how INEE and the Alliance evolve their technical support models in 2026.
